

## Emtech releases new DC-UPS based on the popular 75W DIN-Rail Power Supply.

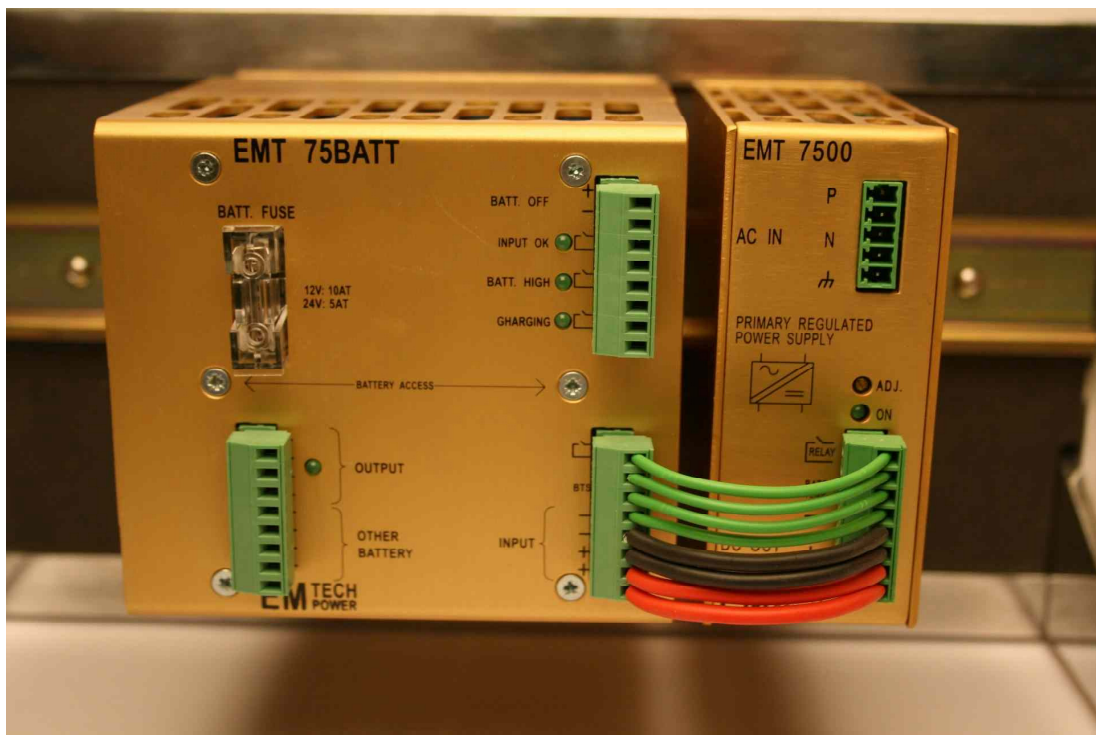

Asnaes, Denmark Jan 2008

EMtech releases DC-UPS which integrates new developed battery pack with the popular EMT7500 serie of power supplies

The EMT75BATT will safeguard your 12V or 24V system application with battery backup of 50 W up to 15 minutes.

The UPS is using the latest technology and designed for DIN-rail mounting and features logic control outputs and alert functions. The built-in electronics will secure a correct charging of the batteries and assure that the necessary back-up power is available.

Units can be mounted in parallel to increase battery capacity and are delivered with connectors and a fixed set of wires for the EMT7500 connection
